Parameters vs. Statistics A parameter is a number that describes the population. Usually its value is unknown. A statistic is a number that can be computed from the ... Probability density function $f(x) = 1$ Sun, 11 Nov 2018 01:22:00 GMT An Introduction to Basic Statistics and Probability - collected only. Inferential statistics is used to make predictions or comparisons about a larger group (a population) using information gathered about a small part of that population. Thus, inferential statistics involves generalizing beyond the data, something that descriptive statistics does not do. Mon, 12 Nov 2018 21:59:00 GMT An Introduction to Statistics - FD hlavnÃ- strÃ;nka - An Introduction to Statistics with Python Book Description: This textbook provides an introduction to the free software Python and its use for statistical data analysis. It covers common statistical tests for continuous, discrete and categorical data, as well as linear regression analysis and topics from survival analysis and Bayesian statistics.
