A three dimensional coordinate system is usually constructed by ensuring that there is a z-axis that passes at a perpendicular angle to both the X-axis as well as the Y-axis at the point of origin of a Cartesian plane (ManualMaths. (2014). geometry, the plane is given
a coordinate system, by
which every point has a pair

of real number coordinates.
Similarly, Euclidean space
is given coordinates where
every point has three
coordinates. The value of
the coordinates depends on
