indicated wherever there is a close application of individual effort; the system of "General Illumination" is adapted for the lighting of general or collective activities. O.C. White Co. - Applied Illumination - 10 Illumination Fundamentals 2.2. Refraction (Snell's law) When light travels from one material to another (such as from air to glass), it refracts - bends and changes velocity. Refraction depends on two factors: the incident angle (\hat{I}_i) and the refractive index of the material, denoted by the letter n. Illumination Fundamentals - Synopsys -
